

Westendorf Manufacturing Co., Inc

"Your Loader Specialists"

We make awesome loaders. *← period!* 

NEW FIT

New fits on **CHALLENGER MT600C Series** tractors.

The Envy of the Loader Industry

Freedom Mount™ Patented Features

The WOW Factor

The styling of the new Freedom Mount™ loaders not only has an undeniable WOW factor, but the intelligent design which places the hydraulic hoses inside the sleek and sturdy arms, not only suppressing wear and tear, but the loader's streamlined profile allows for beautiful unencumbered visibility that no other loader comes close to offering.

SEE the Difference

Westendorf is the only manufacturer to offer patented cylinder positioning inside the loader's arms, which allows the loader to fit large tires and keep the loader close to the tractor and while sitting low along the tractor's hood. You owe it to yourself to compare. Other loaders sit above the hood causing tunnel vision.

We Speak Loader

At Westendorf, we not only speak loader, but our sole purpose has been patenting loader innovation for over 75 years. While other companies are constantly changing who is going to manufacture their loaders, we concentrate on taking all of the knowledge we have gained over the years to make our loaders operate in the best and most efficient way possible—all to make your life easier.

Form Meets Function

Only Freedom Mount™ loaders have the unique design that allows you the freedom to use the bucket to take the loader on and off without the need for tools or dangerous kick stands.

Without a Doubt

Westendorf's revolutionary patented Freedom Mount™ loaders offer unsurpassed quality, performance and strength. Oh, and they are really good looking, too! No wonder Westendorf's Freedom Mount™ loaders are the envy of the industry. Don't let them talk you into anything less.

Patented Freedom Mount™ Design
